Good Evening:

How are you? With the removal activities at the Niagara Falls Boulevard Site, the Steelworks Industrial Park Fire in Lackawanna and the holiday, it has been very hectic.

Below is a quick update. Hope all is well.

From October 14, 2016 through December 08, 2016 the following tasks/events occurred:

- On October 14, 2016, gamma survey assessment was performed at two neighboring homes of Area 5 (Designated Area 6 & 7). Two sampling points were identified via the gamma survey and soil samples were obtained.
- On October 18, 2016, OSC Daly toured OSC Pellegrino at NFB, HTC and 738 UMR Sites. Reporter, Dan Telvock, was encountered at the HTC Site in front of Areas #6 & 7. A brief informal interview was conducted.
- On November 07, 2016, HpGe field instrument analysis initiated from soil samples obtained from Areas 6 & 7.
- On December 06, 2016, soil samples from Areas 6 & 7 were shipped to Certified Fixed Lab.

Anticipated Activities:

- Preliminary soil sample results for Areas 6 & 7.
- Additional Soil Sampling planning for Areas 1, 2 & 4.
- Action Memo draft.
- December 14, 2016, reporter Dan Telvock is scheduled to conduct interview with OSC Daly.
